# Decofloor

## Epoxy Terrazzo System

DecoFloor is a mixture of epoxy polymer flooring combined with beautiful natural stones, enhanced with pigments, and can be customized to your preferences. It creates exceptionally beautiful terrazzo floors that are strong, have minimal joints, strong and not easy to crack, unlike cement based terrazzo

In addition to flooring application, DecoFloor can also be applied on wallls, tables, flower pots and bathroom areas, with a minimum thickness of 1 cm. DeFlakes is a Decorative Flooring System that combines epoxy resin with acrylic paper flakes. Available in various size and vibrant colors.

### 4. Top Seal

TS-204-1K WB, Ca 0,10 Kg-set/m<sup>2</sup> atau Silikat Floor SKF-201-1K WB, Ca 0,15 Kg-set/m<sup>2</sup>

### 3. Bodycoat

Polyfloor PFC-225-3K WB Epocem, Ca 20 Kg-set/m<sup>2</sup> (1 cm) + Propan Colorant Water Based (by request) + Coral Stone (by request) --- Grinding (metal disk #30)

### 2. Sealer

WB Sealer (WBS-224-1K WB), Ca 0,2 Kg/m<sup>2</sup>

### 1. Beton Grinding

(metal disk #30/70)

\*more colors are available

# DeFlakes

## Epoxy Color Flakes System

DecoFloor is a mixture of epoxy polymer flooring combined with beautiful natural stones, enhanced with pigments, and can be customized to your preferences. It creates exceptionally beautiful terrazzo floors that are strong, have minimal joints, strong and not easy to crack,

unlike cement based terrazzo. In addition to flooring application, DecoFloor can also be applied on wallls, tables, flower pots and bathroom areas, with a minimum thickness of 1 cm. DeFlakes is a Decorative Flooring System that combines epoxy resin with acrylic paper flakes. Available in various size and vibrant colors.
